

Shawon

Software / Backend Developer

01703625690 | **GitHub:** github.com/mcubd | **Linkedin:** linkedin.com/in/abdullah-swn

CAREER SUMMARY

Software developer with 5 years of experience in backend development, app logic, and database design. My technical stack includes 3 years of experience with JavaScript (Express.js, Node.js), 8 months with Python, 4 months with Java, 2 months with React, alongside specialized skills in MongoDB and MySQL database design. Additionally, I excel in offline video caching, system architecture, and quickly mastering new technologies.

TECHNICAL SKILLS

Programing Language:	JavaScript / Node.js (3 years), Python (8 months), Java (4 months), React (2 months)
Backend & API:	Express.js, RESTful API Design, Backend Architecture, System Logic
App & Desktop:	Android App Development, Tauri Framework (Desktop App)
Tools & Environment :	Linux Terminal/OS, Git, GitHub, LaTeX (Mathematical Formatting)

PROJECT EXPERIENCE

ACS Play Store Application (Android App) | Android Offline Caching Video Player

- Developed an advanced video streaming module for ACS(Online Educational Platform), supporting progressive offline playback for partially downloaded content.
- Implemented a dynamic secure storage mechanism that enables offline viewing while preventing unauthorized exports or video piracy, ensuring total content protection for the company.
